NEW RUBBER GOODS and TESTING

Managed safety services for dielectric rubber gloves, sleeves, blankets, line hose and covers. Performed in accordance with ASTM / OSHA standards, with accreditation by NAIL for PET

WESCO Utility's Rubber Goods Testing Process

Clean: A detailed clean allows for better accuracy during visual inspections (both during testing and in the field), while reducing cross-contamination of products and removing harsh dirt, oils, and contaminants to prolong the life of the goods.

Test to ASTM Standards: Detailed visual inspection and electrical tests are performed in our on-site testing facilities.

Detailed Reporting Process: Printed test reports accompany every order and digital records are kept on file.

ITEM:

Insulating Gloves
Insulating Blankets
Insulating Line Hose
Insulating Covers

STANDARD:

D120 F496
D1048 F479
D1050 F478
D11049 F478

WESCO Utility offers comprehensive equipment testing, servicing and certification to the high-voltage industry in the Canadian market. Our service centre is a NAIL for PET (North American Independent Laboratories for Protective Equipment Testing) accredited and BC Hydro approved dielectric testing facility for certification and repair of; electrical, hydraulic and mechanical construction tools, safety gloves and equipment, and is an approved warranty repair centre for hydraulic and mechanical tools & equipment.

Our electric testing and service centre has supplied the poleline requirements of utility companies and line contractors in Western Canada since 1972. Since then our customer base has expanded to include electrical wholesalers, municipalities, the mining sector, oil and gas industries, telecommunication sector, pulp and paper and lumber industries worldwide.

WESCO Utility is proud to be a partner of CEA (Canadian Electrical Association).

Are Your Rubber Goods in Compliance?

Regular inspection and testing intervals are designed to keep users safe. Rubber can become compromised through regular use, age, exposure to sharp objects, dirt, oils, petroleum-based products, environmental fluctuations, and improper storage. For these reasons, regular visual and electrical inspections are mandated by ASTM and OSHA

BEST PRACTICES FOR TESTING RUBBER INSULATING PRODUCTS						
	BEFORE FIRST USE	30-60 DAYS	90 DAYS	6 MONTHS	1 YEAR	IF DAMAGE SUSPECTED
GLOVES	Required	Optional	Recommended	Required	Required	Required
SLEEVES AND BLANKETS	Required	Optional	Recommended	Recommended	Required	Required
LINE HOSE AND HOODS	Required	Optional	Optional	Optional	Recommended	Required
